

MARK CHRISTIAN ALLYSON C. FEDERIO

allysonfederio0311@gmail.com | 09702425499 | 595 Collantes Residences, Brgy. Dugcal, Camaligan, Camarines Sur

PROFESSIONAL OBJECTIVE

Motivated Computer Science undergraduate at Ateneo de Naga University with a strong foundation in software development, artificial intelligence, and machine learning. Experienced in one-on-one programming instruction and technical mentoring across multiple languages and learner levels. Eager to contribute analytical, problem-solving, and development skills to a dynamic technology team through internship or entry-level opportunities in software engineering, AI/ML, or application development.

TECHNICAL SKILLS

Programming Languages

Python · Java · C · C++ · JavaScript (Basic) · SQL

AI & Machine Learning

ML Fundamentals · Natural Language Processing · Data Preprocessing · Model Evaluation

Web Development

HTML · CSS · JavaScript

Systems & Networking

Linux Fundamentals · Network Fundamentals · Server Administration · Security Best Practices

Database Technologies

MySQL · Database Design · SQL Query Development

Development Tools

Git/GitHub · VS Code · IntelliJ IDEA · Jupyter Notebook · Overleaf · Eclipse

PROFESSIONAL EXPERIENCE & PROJECTS

Freelance Programming Tutor | Remote

Ongoing

Under Franco Bien · Dubai-based Students and Academic Institutions

- Delivered one-on-one programming instruction in C, C++, Java, and Python to students enrolled in Dubai-based schools.
- Introduced foundational and intermediate concepts in Artificial Intelligence, Machine Learning, and Natural Language Processing adapted to individual learner levels.
- Developed customized learning materials, coding exercises, and structured problem-solving frameworks to reinforce technical comprehension.
- Assisted students in debugging, testing, and optimizing code across multiple paradigms and development environments.

Independent Developer — Personal & Academic Projects

Ongoing

Self-directed · Ateneo de Naga University

- Developed academic coursework projects spanning software applications, database-driven systems, and object-oriented programming solutions.
- Built and deployed small-scale utility applications and mini-apps as independent side projects, applying theoretical concepts to practical use cases.
- Conducted self-directed experimentation in AI and ML, including data preprocessing pipelines, model evaluation, and NLP prototyping.
- Maintained version-controlled codebases using Git and GitHub for individual and collaborative projects.

EDUCATION

Ateneo de Naga University

Present

Bachelor of Science in Computer Science

Software Engineering · Data Structures & Algorithms · AI · ML · NLP · Operating Systems · Computer Networks · Database Systems

University of Nueva Caceres

Graduate

Senior High School

CORE COMPETENCIES

Analytical Thinking

Problem Solving

Technical Mentoring

Communication Skills

Team Collaboration

Attention to Detail

Adaptability

Self-directed Learning

Time Management

Project Organisation
